WEEK 1 · LECTURE L1 OF 3 · UNIT I

Orientation, the Course Gem and Pod Formation

What this course asks of you, how it is marked, and how your pod will work.

Part 1 Syllabus, learning outcomes and assessment

Part 2 The Course Gem: your AI thinking partner

Part 3 The flipped cycle and the Learning Contract

Part 4 Pod formation, roles, survey and consent

Read Schwab (2016), Introduction and Part I; Stone et al. (2015)

R K Singh · Senior Professor, Department of Commerce · Delhi School of Economics, University of Delhi · DSEH001 · M.Com. PGCF 2025

PART 1 · LEARNING OUTCOMES

By the end of the course you will be able to

CLO	You will be able to	Assessed by
1	Analyze the drivers of digital transformation in HR: Industry 4.0, maturity models, strategic alignment	End-Term; Quiz 1; D1
2	Analyze HR platforms (HRIS, ATS, onboarding, LMS, engagement apps, chatbots, mobile HR) and their adoption	End-Term; Quizzes 2 and 3; D1
3	Evaluate people analytics, AI and algorithmic decisions for fairness, transparency and bias	End-Term; Quiz 4; D1, D2; Reflections
4	Design adoption interventions and readiness frameworks backed by metrics and evidence	End-Term; Quiz 4; D1; D2
5	Reflect critically on ethics, fairness and HR's role as a digital change agent	End-Term; Quiz 5; D2; Reflections

L1 · ASSESSMENT

Where the 120 marks come from

Component	Marks	What it involves
End-Term Examination	90	University written examination
Quizzes	10	Five quizzes of 2 marks, held in class
Pod deliverables	8	D1 Maturity and Tech-Stack Blueprint; D2 Future-of-Work Board Memo
Individual engagement	6	Peer evaluation 2, instructor observation 2, reflection logs 2
Attendance	6	As per University of Delhi norms

READ THIS AS

Internal marks reward steady work across the semester. A missed round or reflection cannot be made up at the end.

PART 2 · THE COURSE GEM

Arjun: a thinking partner that asks back

What it is

A custom AI assistant loaded with the syllabus, the GreenLeaf pack, weekly themes and the AI Use Policy. You open it from Google Classroom.

How it behaves

It answers with questions, not conclusions. It is built to make you think harder, not to think for you.

What you keep

An AI Learning Log of what you asked and what you learned. It feeds your three Reflection Logs.

WHY THIS DESIGN

In a course about AI in HR, you experience the same tension you will later manage: AI should strengthen human judgment, not replace it.

L1 · HOW THIS COURSE WORKS

Every week runs the same three-step cycle

Before class

Read the set readings. Work through the Course Gem tasks (about 1.5 to 2 hours). Arrive with a question already formed.

In class

Discussion, cold calls, cases and debriefs. You build on a classmate's idea instead of repeating your own.

After class

Reflect, answer the forum prompt, and apply the week's idea to your pod's live Disha work.

L1 introduces the concept

The theory, in plain terms.

L2 develops it

Cases, tools and worked examples.

L3 is the simulation

Round briefings, workshops and debriefs.

THE SPINE

Project Disha is not a side activity. The lectures exist to sharpen the decisions your pod makes on the Disha platform.

PART 3 · THE LEARNING CONTRACT

Four commitments, in a flipped classroom

When	What is expected of you
Before class	Do the readings and the Course Gem tasks. Arrive with a question formed. Keep your pod's Disha round moving.
During class	Discuss, debate, answer cold calls. Build on a classmate's idea rather than repeating your own.
After class	Reflect with the Gem, answer the forum prompt, and apply the idea to your pod's live decisions.
All semester	Original work, an honest AI Learning Log, and fair peer evaluation of your pod members.

THE SHIFT

Class time is for using ideas, not hearing them for the first time. If you skip the reading, the class cannot help you.

PART 4 · PODS AND ROLES

Five people, five roles, rotating every round

CHRO / Pod Lead

Leads the round and is the only member who can submit.

HR Analytics Lead

Computes the figures from the workbook.

Technology and Data Governance Lead

Checks systems, data and the law.

Change and Employee Experience Lead

Asks how people will actually adopt it.

Ethics and Worker Voice Lead

Speaks for those the design may leave out.

THE RULES

Roles rotate each round, so everyone holds all five. Work autosaves as anyone types, but a submission locks for good. Your private HR Kundali grows from your own choices and carries no marks.

Going deeper: the theory underneath this course

The next slides set out Kolb, Knowles and Vygotsky, the evidence on active learning, and Tuckman and social loafing for pods: what each claims, how it works, where it breaks, and what it means at GreenLeaf.

THEORY IN DEPTH · KOLB (1984)

Learning is a cycle, not a transfer of facts

THE CORE IDEA

Knowledge is created by transforming experience. A lecture alone covers only one quarter of the cycle.

HOW IT WORKS

Concrete experience, then reflective observation, then abstract concepts, then active experimentation, and round again.

LIMITS AND CRITIQUE

Critics say the stages rarely run in neat order, and the linked learning-styles idea has weak evidence.

AT GREENLEAF

Disha is the concrete experience; the lectures and debriefs supply reflection and concepts; the next round is the experiment.

THEORY IN DEPTH · KNOWLES (1984); VYGOTSKY (1978)

Adults learn what they need, with the right scaffold

THE CORE IDEA

Adults are self-directed, bring experience, and learn when a real problem demands it (Knowles).

HOW IT WORKS

The zone of proximal development: what you can do with help but not yet alone. Help is withdrawn as skill grows (Vygotsky).

LIMITS AND CRITIQUE

Andragogy describes tendencies, not laws; many adults still want structure early on.

AT GREENLEAF

The Course Gem is a scaffold. It asks back instead of answering, so the work stays in your zone of growth.

THEORY IN DEPTH · FREEMAN ET AL. (2014)

The evidence for active learning is strong

THE CORE IDEA

A meta-analysis of 225 STEM studies compared active learning with traditional lecturing.

HOW IT WORKS

Exam scores rose by about 6%. Students in lecture-only classes were 1.5 times more likely to fail.

LIMITS AND CRITIQUE

The studies come mostly from science courses; effects depend on how well the activity is designed.

AT GREENLEAF

This is why class time here is cold calls, debriefs and exercises, and why reading beforehand is not optional.

THEORY IN DEPTH · TUCKMAN (1965); LATANÉ ET AL. (1979)

Teams develop in stages, and effort can hide

THE CORE IDEA

Groups move through forming, storming, norming and performing. Conflict is a normal stage, not a failure.

HOW IT WORKS

Social loafing: people exert less effort in a group when their own contribution cannot be seen.

LIMITS AND CRITIQUE

Real teams loop back through stages; loafing falls when tasks matter and contributions are identifiable.

AT GREENLEAF

Rotating roles and peer evaluation make each member's work visible. That is the design answer to loafing.

BEFORE L2

Three things to do before the next lecture

1 · Open the Gem

Ask it to explain the difference between digitizing HR and transforming HR, then let it test you.

2 · Write 100 words

What do you think good digital HR looks like? Keep it. We return to it in Week 12.

3 · Read

Schwab (2016), Introduction and Part I; Stone et al. (2015) on technology and the future of HRM.

CONSENT

The pod-formation survey asks only what is needed to form balanced pods, and you are told how it will be used. That is the DPDP principle in miniature.
