DSEH004 · PERFORMANCE MANAGEMENT AND EMPLOYEE ENGAGEMENT

Psychological Capital and the Round 1 Debrief

Week 3 · Lecture 3 · Unit II · Hope, efficacy, resilience and optimism, and integrating the Unit II theories

R K Singh
Senior Professor, Department of Commerce, Delhi School of Economics, University of Delhi

L3 · COMMIT BEFORE THEORY

Optimism is a personality trait. Training cannot change it.

Agree or disagree. What would count as evidence?

L3 · THE CONSTRUCT

Psychological capital: HERO

COMPONENT	DEFINITION	THEORETICAL ROOT
Hope	Willpower and waypower: agency and pathways to goals	Snyder's hope theory
Efficacy	Confidence to succeed at a specific task	Bandura (1997)
Resilience	Bouncing back from adversity and beyond	Developmental psychology
Optimism	Explaining good events as lasting, bad as temporary	Seligman's explanatory style

PsyCap is state like: more open to development than traits, more stable than moods.

Luthans, Youssef and Avolio (2007)

L3 · HOW EFFICACY IS BUILT

Bandura's four sources

Mastery experiences

Succeeding at tasks of increasing difficulty: the strongest source.

Vicarious experience

Seeing similar others succeed.

Verbal persuasion

Credible encouragement from others.

Physiological states

How the body's arousal is interpreted.

Bandura (1997)

Does PsyCap matter, and can it be developed?

AVEY ET AL. (2011)

Outcomes

PsyCap related positively to satisfaction, commitment, wellbeing and performance; negatively to cynicism and turnover intentions.

LUTHANS ET AL. (2006)

Development

A brief, structured micro intervention raised participants' PsyCap.

NEWMAN ET AL. (2014)

Critique

Overlap with related constructs and reliance on self report remain open problems.

Four theories, four scarce things

THEORY	WHAT IS SCARCE	INTERVENTION IT IMPLIES
Kahn	Meaning, safety, availability	Repair conditions for presence
JD R	Job resources against demands	Inject resources, remove hindrances
SDT	Need satisfaction	Autonomy supportive management
PsyCap	Personal resources	Develop hope, efficacy, resilience, optimism

L3 · ROUND 1 CROSS POD DEBRIEF

What we will look for

1 **Lens**
Which diagnostic frame did each pod choose, and why?

2 **Blind spot**
What could the chosen lens not see in the inherited data?

3 **Anchors**
Which of the four anchors would your diagnosis miss?

L3 · NEXT

Round 2 asks you to replace the annual appraisal with a system that can survive Manager Quality of 3.09 at 0.8 one to ones per round.

Read Buckingham and Goodall (2015) again, this time as a designer.
