DSEH004 · PERFORMANCE MANAGEMENT AND EMPLOYEE ENGAGEMENT

Recognition Program Design

Week 11 · Lecture 1 · Unit IV · Forms of recognition, reinforcement evidence, SDT, equity and the Indian context

R K Singh
Senior Professor, Department of Commerce, Delhi School of Economics, University of Delhi

L1 · QUIZ 5

Quiz 5 opens now.

Phones go away once you submit. We begin the lecture when the quiz closes.

L1 · COMMIT BEFORE THEORY

Recognition is simply a cheaper form of pay.

Agree or disagree.

L1 · WHAT IS BEING RECOGNIZED

Brun and Dugas (2008)

FORM	RECOGNIZES	EXAMPLE
Personal	The person as a unique individual	Remembering what matters to them
Work practice	How the work is done	Praising a careful quality check
Job dedication	Effort and commitment	Thanks for staying through peak season
Results	Outcomes achieved	Celebrating a target met

Most programs recognize only results. The other three forms reach people whose results depend on others.

Stajkovic and Luthans

STAJKOVIC AND LUTHANS (1997)

Behavior modification

Organizational behavior modification improved task performance by about 17 percent on average.

STAJKOVIC AND LUTHANS (2003)

Three reinforcers

Money, feedback and social recognition each improved performance; combined, the effect was largest.

Informational or controlling

DECI, KOESTNER AND RYAN (1999)

SDT

Verbal recognition that informs competence supports intrinsic motivation; recognition used to control undermines it.

ADAMS (1965)

Equity

People compare the ratio of their outcomes to inputs with others'. Public awards invite comparison.

Designing for Bharat Textiles

HOFSTEDE (2001)

Collectivism

Team recognition may carry more weight than singling out one person.

DESIGN CHOICE

Family

Recognition that includes family can extend its meaning.

DESIGN CHOICE

Festivals

Timing around regional festivals can signal respect, if it is not tokenistic.

Inherited recognition frequency is 35 percent against a target of 55 percent.

Employee of the month

THEORY	PREDICTION
Reinforcement	Raises the rewarded behavior
SDT	Supports motivation if informational, harms it if controlling
Equity	Non winners compare and may withdraw
Collectivism	Singling out may embarrass and isolate
