DSEH004 · PERFORMANCE MANAGEMENT AND EMPLOYEE ENGAGEMENT

Performance Culture Transformation

Week 11 · Lecture 2 · Unit IV · Schein's levels and embedding mechanisms, psychological safety, culture and performance

R K Singh
Senior Professor, Department of Commerce, Delhi School of Economics, University of Delhi

L2 · COMMIT BEFORE THEORY

A new values statement changes a company's culture.

Agree or disagree. What would have to change instead?

L2 · SCHEIN'S THREE LEVELS

What culture is made of

LEVEL	WHAT IT IS	EXAMPLE AT BHARAT TEXTILES
Artifacts	Visible structures and processes	The appraisal form, the town hall
Espoused values	Stated strategies and goals	“We value development”
Basic assumptions	Taken for granted beliefs	Ratings exist to justify pay

Schein (2010)

Schein's primary embedding mechanisms

Attention

What leaders pay attention to, measure and control.

Allocation

How resources, rewards and status are allocated.

Role modeling

What leaders do, coach and teach.

People decisions

Who is recruited, promoted and let go.

A PM system is an embedding mechanism. It tells people what leaders really attend to.

Edmondson

EDMONDSON (1996)

The surprise

Better led hospital teams reported more errors, because members felt safe to report them.

EDMONDSON (1999)

The construct

A shared belief that the team is safe for interpersonal risk taking, which predicts learning behavior.

FRAZIER ET AL. (2017)

The evidence

Safety related to learning, engagement and performance across many studies.

Strong is not the same as good

KOTTER AND HESKETT (1992)

Adaptive cultures

Cultures that valued adaptation outperformed merely strong cultures over the long run.

CAMERON AND QUINN (2006)

Competing values

Clan, adhocracy, market and hierarchy cultures emphasize different values.

Compare the four Round 6 centers of gravity with these four culture types. Which map closely, and which do not?

Why culture change fails

KOTTER (1995)

Too early victory

Declaring success before changes sink into culture.

KOTTER (1995)

Too little urgency

Failing to establish why change is needed now.
