DSEH004 · PERFORMANCE MANAGEMENT AND EMPLOYEE ENGAGEMENT

Final Presentations, Part 1: Defending a Design

Week 12 · Lecture 1 · Synthesis · The structure of a defensible argument and how the panel will question you

R K Singh
Senior Professor, Department of Commerce, Delhi School of Economics, University of Delhi

L1 · COMMIT BEFORE THEORY

A strong presentation shows that the design will work.

Or does it show what would prove it wrong?

Toulmin (1958)

ELEMENT	IN YOUR PRESENTATION
Claim	Your recommended design
Data	The dataset figures behind it
Warrant	The theory that links data to claim
Backing	The evidence for that theory
Qualifier	How confident you are, and for whom
Rebuttal	When the claim would not hold

Falsifiability

POPPER (1959)

Popper's criterion

A claim is scientific only if some observation could show it to be false.

For your pod

Name the evidence that, within a year, would show your design had failed.

L1 · FORMAT

12 minutes per pod

1 **10 minutes**
Diagnosis, PM design, engagement strategy, culture roadmap, Board Memo highlights.

2 **2 minutes**
Questions from the panel and peers.

L1 · QUESTIONS TO PREPARE FOR

What the panel will ask

QUESTION	THEORY BEHIND IT
Who carries this design on Monday morning?	Manager coalition
Which anchor does it serve least?	The four anchors
What did you choose not to do, and why?	Trade offs
What would show it failed?	Falsifiability
