DSEH004 · PERFORMANCE MANAGEMENT AND EMPLOYEE ENGAGEMENT

Final Presentations, Part 2: From Knowing to Doing

Week 12 · Lecture 2 · Synthesis · Implementation gaps, peer judgment and the strongest themes of the cohort

R K Singh
Senior Professor, Department of Commerce, Delhi School of Economics, University of Delhi

L2 · COMMIT BEFORE THEORY

The best plan is the one with the most theory behind it.

Or the one most likely to be carried out?

Pfeffer and Sutton (2000)

The gap

Organizations know what to do and still fail to do it.

Causes

Talk substituting for action, fear, memory of past practice, and measures that reward the wrong things.

Pressman and Wildavsky (1973)

Chains of clearances

Each additional actor who must agree multiplies the chance that a plan stalls.

At Bharat Textiles

Count how many managers must act for your design to work.

Coherent and feasible are different tests. Strong HR systems need both: a clear message and consistent delivery.

Pressman and Wildavsky (1973); Bowen and Ostroff (2004)

Aggregated judgment

SUROWIECKI (2004)

When crowds are wise

Diverse, independent judgments aggregated well can outperform individual experts.

Your vote

Vote independently, before discussion, on the most coherent and the most feasible plan.

L2 · DEBRIEF

Which plan was most coherent? Which was most feasible? Were they the same plan?
