WEEK 12 · LECTURE L3 · SYNTHESIS

Course Synthesis and End Term Preparation

Units I to IV as one model, the comparisons the end term favors, how to answer, and how to revise.

R K Singh · Senior Professor, Department of Commerce · Delhi School of Economics, University of Delhi

DSEH004 · Performance Management and Employee Engagement · M.Com. PGCF 2025 · Exam preparation edition

AFTER THIS LECTURE YOU SHOULD BE ABLE TO

What this lecture prepares you for

- Connect Units I to IV into one coherent model.
- Distinguish the theory pairs most often compared.
- Structure a 20 mark and a 10 mark answer.
- Plan revision using retrieval practice.

COURSE OUTCOMES

CLO 1 to CLO 5, integrated.

RETURN

What do you now believe about performance management that you did not believe in Week 1?

Write two lines before we begin.

THE ARC OF THE COURSE

Four units, one model

Stage	Unit	Core question
Diagnosis	Unit II	Why are people engaged or not?
Design	Unit I	What system manages performance?
Strategy	Unit III	How do we act on engagement at scale?
Culture	Unit IV	What makes it last?

COMPARISONS THE END TERM FAVORS

Know how each pair differs

Pair	The difference that matters
Kahn and Q12	Psychological presence, versus conditions a manager controls
Job Demands Resources and SDT	Resources against demands, versus needs and the quality of motivation
SDT and psychological capital	Needs met by the context, versus resources held by the person
OKRs and balanced scorecard	Ambitious quarterly goals, versus a strategy map across perspectives

THE END TERM EXAMINATION

Format and criteria

Feature	Detail
Duration and marks	3 hours, 90 marks
Questions 1 to 4	20 marks each; attempt one of two options
Question 5	10 marks; attempt one of two options
Criteria	Concepts 30, application 35, critical analysis 20, integration 15 percent

From the Lesson Plan, section 14.

HOW TO ANSWER

A structure for a 20 mark answer

DEFINE

Define the concepts the question turns on; state your approach

ANALYZE

Apply frameworks systematically, with evidence for each claim

ILLUSTRATE

Use Indian organizational examples

CONCLUDE

Synthesize, recommend, and state the limits of your argument

THEORY IN DEPTH · ROEDIGER AND KARPICKE (2006)

Retrieval beats rereading

THE CORE IDEA

Practicing retrieval produces better long term retention than restudying the same material.

HOW IT WORKS

Students who were tested remembered more a week later than those who restudied, although restudy felt more effective.

LIMITS AND CRITIQUE

Studied with prose passages; it improves memory, which you must still turn into argument.

IN PRACTICE

Write one full 20 mark answer in 30 minutes without notes, then check it against the slides.

EXAM LENS

Pacing is the most common failure. Practice timed answers, not only reading.

PRACTICE FOR THE END TERM EXAMINATION

Questions to rehearse

"Engagement must be diagnosed before a performance system is designed." Discuss using at least one theory from each unit. **20 marks**

A strong answer: links diagnosis (Kahn, Job Demands Resources) to design (goals, OKRs), strategy (Saks) and culture (Schein); uses an Indian example.

Compare self determination theory and goal setting theory as foundations for performance management. **20 marks**

A strong answer: contrasts quality and amount of motivation; uses Cerasoli et al. and Locke and Latham; proposes a combined design.

Distinguish OKRs from the balanced scorecard. **10 marks**

A strong answer: purpose, horizon, ambition and transparency; one example each.

CARRY THESE INTO THE EXAMINATION

Three things to remember

1. Diagnose, design, strategize, embed: the arc of the course
2. Every theory has a weakness; naming it earns the critical marks
3. Practice retrieval and timed answers, not rereading

SET READINGS · FROM THE LESSON PLAN
